

Advance ASA-EDGE

Versatile Walking Foot Sewing Machine for Event Graphics

Adjustable for
9-15
MM Wide
Keder

Enhanced Adaptability

- Interchangeable folders with a quick-change system ensure you can tailor the machine to your needs without wasting time on setup.
- Can be used for attaching Keder/SEG for tension framed and light box graphics as well as sewing custom pole-pockets for flags and hanging banners.

Hassle-Free Production

- Let the machine do the hard work for you with automatic functions such as thread trimmer, foot lift, and backtack.
- Produce a flawless finish every time with no sewing experience necessary thanks to the simple control panel and detachable guides.

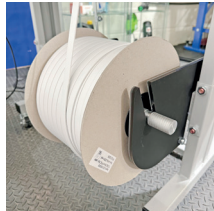

The Advance ASA-EDGE is an entry-level sewing system designed as the ultimate solution for producing high-quality event graphics on a smaller scale. Ideal for businesses with limited space or smaller production needs, this versatile machine requires a more hands-on approach than our conveyors while remaining accessible to operators with minimal sewing experience.
